

Certified Innovation Professional®

CInP® Question Bank

Practice question bank for exam preparation

Prepared by GELLIFY Middle East

Organized by lesson, aligned to CInP Course Workbook V1.5

May 2026

How to Use This Question Bank

This Question Bank contains 300 multiple-choice questions covering the full CInP exam scope, organized by lesson in the order of the CInP Course Workbook V1.5.

Each question has four answer options (A–D). There is exactly one best answer.

Record your answers on a separate sheet, then check them against the Answer Key - which gives a short rationale and the relevant Course Workbook page reference.

If a term in a question is unfamiliar, look it up in the companion CInP Glossary.

Topic & Lesson Index

Topic	Lesson (pages)	# Qs	Question IDs
The Innovation Professional	Lesson 1 (pp. 5-9)	8	Q001–Q008
Fundamentals of Innovation	Lesson 2 (pp. 10-19)	25	Q009–Q033
Three Phases of Innovation	Lesson 3 (pp. 20-23)	5	Q034–Q038
Innovation's Design Outputs	Lesson 4 (pp. 24-31)	13	Q039–Q051
The Effective Innovator	Lesson 5 (pp. 32-59)	15	Q052–Q066
Creativity & Creativity Methods	Lesson 6 (pp. 60-70)	15	Q067–Q081
Ideation & Brainstorming	Lesson 7 (pp. 71-81)	17	Q082–Q098
Oblique Examination	Lesson 8 (pp. 82-103)	11	Q099–Q109
Running Innovation Projects	Lesson 9 (pp. 104-158)	36	Q110–Q145
Research in Innovation	Lesson 10 (pp. 159-214)	38	Q146–Q183
Design Thinking	Lesson 11 (pp. 215-253)	20	Q184–Q203
The Innovation Manager	Lesson 12 (pp. 254-257)	8	Q204–Q211
Core Innovation Teams	Lesson 13 (pp. 258-266)	10	Q212–Q221
Project Leader	Lesson 14 (pp. 267-310)	7	Q222–Q228
Innovation Management Process	Lesson 15 (pp. 311-336)	21	Q229–Q249
Storytelling	Lesson 16 (pp. 337-346)	9	Q250–Q258
Selecting Winning Ideas	Lesson 17 (pp. 347-357)	13	Q259–Q271
Integration	Lesson 18 (pp. 358-362)	2	Q272–Q273
Engagement	Lesson 20 (pp. 367-387)	8	Q274–Q281
Open Innovation	Lesson 21 (pp. 388-400)	11	Q282–Q292
PM Tools	Lesson 22 (pp. 401-410)	8	Q293–Q300

Lesson 1 - The Innovation Professional

Workbook reference: pp. 5-9 | 8 questions

Q001. As an Innovation Professional, you may be called upon to develop what type of strategies for each innovation concept?

- A. Financial
- B. Legal
- C. Commercialization
- D. Human Resource

Q002. An Innovation Professional may serve in one of two formal management roles in the business, namely ____.

- A. Innovation Project Leader or Innovation Program Leader
- B. Innovation Mentor or Innovation Champion
- C. Innovation Provocateur or Innovation Auditor
- D. Innovation Sponsor or Innovation Owner

Q003. Throughout their many roles, an Innovation Professional becomes a primary contributor to a program of sustained innovation output, constantly feeding the business' ____ with new projects that allow it to achieve strategically important growth initiatives.

- A. Innovation Funnel
- B. Innovation Pipeline
- C. Innovation Dragnet
- D. Innovation Portfolio

Q004. Which of the following is NOT a typical task carried out by an Innovation Professional?

- A. Uncovering unmet or underserved market needs
- B. Developing informed hypotheses about needs
- C. Negotiating union contracts with manufacturing workers
- D. Running pilot tests to validate each new opportunity

Q005. As an individual contributor, an Innovation Professional may serve on the Front End Innovation Team. Their primary work in that role involves ____.

- A. execution, implementation, and commercialization
- B. strategizing, modeling, justification, and defense
- C. research, qualification, quantification, and initial definition
- D. manufacturing, quality, and supply chain integration

Q006. An Innovation Professional on the Mid Zone Innovation Team primarily focuses on ____.

- A. research, qualification, quantification, and initial definition
- B. strategizing, modeling, justification, and defense
- C. execution, implementation, and commercialization
- D. branding, marketing, and channel sales

Q007. An Innovation Professional on the Back End Innovation Team primarily focuses on ____.

- A.** research, qualification, quantification, and initial definition
- B.** strategizing, modeling, justification, and defense
- C.** execution, implementation, and commercialization
- D.** ideation, brainstorming, and creativity

Q008. The Innovation Program Leader is primarily responsible for ____.

- A.** driving and managing the business' Innovation Management process
- B.** managing a single innovation project from start to finish
- C.** designing prototypes for a Core Innovation Team
- D.** writing business plans for the executive committee

Lesson 2 - Fundamentals of Innovation

Workbook reference: pp. 10-19 | 25 questions

Q009. The four general types of business innovation are what?

- A.** Incremental, Breakthrough, Disruptive, Transformative
- B.** Sustaining, Radical, Disruptive, Reinventive
- C.** Incremental, Radical, Cannibalizing, Reinventive
- D.** Sustaining, Breakthrough, Cannibalizing, Transformative

Q010. The three Scales of Innovation are what?

- A.** Global, Regional, Local
- B.** Grand Scale, Broad Scale, Narrow Scale
- C.** Large, Medium, Small.
- D.** Mega, Macro, Micro.

Q011. Sustaining Innovation, Derivative Innovation, and Moderate Innovation are alternative names for what type of innovation?

- A.** Breakthrough Innovation
- B.** Incremental Innovation
- C.** Disruptive Innovation
- D.** Transformative Innovation

Q012. Radical Innovation is a catch-all phrase typically referring to ____.

- A.** Incremental Innovation only
- B.** any of Breakthrough, Disruptive, or Transformative Innovation
- C.** Sustaining Innovation only
- D.** Reinventive Innovation only

Q013. Which type of business innovation involves entirely new categories that displace previous categories, typically requiring new business models?

- A.** Incremental Innovation
- B.** Breakthrough Innovation
- C.** Disruptive Innovation
- D.** Transformative Innovation

Q014. Which type of business innovation involves radically new offerings or experiences that transform society and how it operates?

- A.** Incremental Innovation
- B.** Breakthrough Innovation
- C.** Disruptive Innovation
- D.** Transformative Innovation

Q015. The scale of innovation concerned with individual innovation projects and the many activities within them is ____.

- A.** Mega Innovation
- B.** Macro Innovation
- C.** Micro Innovation
- D.** Nano Innovation

Q016. The scale of innovation concerned with the strategic level within business organizations - including Innovation Strategy and Enterprise Innovation Programs - is ____.

- A.** Mega Innovation
- B.** Macro Innovation
- C.** Micro Innovation
- D.** Meta Innovation

Q017. For an idea to qualify as an innovation, it must be ____.

- A.** patented
- B.** executed
- C.** approved by the board
- D.** peer-reviewed

Q018. Innovation is ____ to the customers and markets receiving it, which is why innovations can sometimes be 'recycled' from one market to another.

- A.** absolute
- B.** relative
- C.** permanent
- D.** theoretical

Q019. According to the Drucker Venn diagram for whether something qualifies as an innovation, the three questions are: Is it desirable to users (Human)? Is it viable to the business? Is it ____?

- A.** valuable to investors
- B.** feasible technologically
- C.** compliant with regulations
- D.** differentiated from competitors

Q020. Business innovation is doing something in a new or novel way that delivers more value and/or better experiences to customers and markets in a way that is ____.

- A.** fashionable for the times
- B.** profitable to the business
- C.** aligned to a specific brand
- D.** scientifically demonstrable

Q021. The four stakeholders for whom a business creates value through innovation are ____.

- A.** Markets & Customers, Workers, Investors/Shareholders, Society at large
- B.** Markets, Government Regulators, Suppliers, the Brand

- C. Customers, Banks, Workers, Patent Office
- D. Customers, Stockholders, Executives, Lawyers

Q022. On a philosophical level, innovation is fundamentally about ____.

- A. disrupting industries
- B. connecting two things on a deeper and more meaningful level
- C. achieving competitive advantage
- D. extracting more profit per unit

Q023. The real point/purpose of innovation in a business is to enable the business to ____.

- A. remain relevant to its markets so it can advance its cause and remain resilient
- B. achieve quarterly earnings growth targets
- C. win industry innovation awards
- D. extend its patent portfolio

Q024. An example of Incremental Innovation in consumer electronics would be ____.

- A. the very first iPhone
- B. Apple iPhone generation-over-generation improvements
- C. the launch of the iPad disrupting laptops
- D. the introduction of the Internet

Q025. An example of Breakthrough Innovation in consumer electronics would be ____.

- A. the Apple Watch
- B. the second-generation iPhone
- C. a new color option for an existing device
- D. a price reduction on existing products

Q026. An example of Disruptive Innovation in consumer electronics would be ____.

- A. A faster processor in an existing laptop line
- B. Apple's iPad, which disrupted laptop usage patterns
- C. An incremental improvement to battery life
- D. Adding a new charger port to a phone

Q027. The most cited example of a Transformative Innovation is ____.

- A. the personal computer
- B. the Internet
- C. the smartphone
- D. email

Q028. Which is NOT one of the forms of innovation listed in the workbook?

- A. business innovation
- B. urban innovation
- C. social innovation
- D. constitutional innovation

Q029. Macro Innovation typically underlies which type of recognition?

- A.** A scientist's Nobel Prize
- B.** A 'world's most innovative companies' ranking
- C.** An individual patent grant
- D.** A consumer product design award

Q030. Which of the following is a characteristic of Disruptive Innovation that distinguishes it from Breakthrough Innovation?

- A.** It is always more expensive than what it replaces
- B.** It typically requires new business models, not just new offerings
- C.** It only happens in technology sectors
- D.** It always involves software

Q031. An idea that has not yet been executed is best classified as ____.

- A.** an innovation
- B.** an invention
- C.** a concept or idea, but not yet an innovation
- D.** a disruption

Q032. The purpose of a business is to ____.

- A.** create value for all stakeholders
- B.** maximize shareholder return on capital
- C.** minimize taxes and regulatory burdens
- D.** achieve maximum market share

Q033. Which of the following pairs correctly matches the type of innovation with its scope?

- A.** Incremental - entirely new categories
- B.** Breakthrough - modest improvements within an existing line
- C.** Disruptive - radical reshaping of society
- D.** Transformative - radically new offerings/experiences that transform society

Lesson 3 - Three Phases of Innovation

Workbook reference: pp. 20-23 | 5 questions

Q034. The Front End of Innovation refers to the early upfront research and discovery needed to do two things. The second of these is what?

- A.** Generate new ideas to think about.
- B.** Generate an optimal solution for a particular problem.
- C.** Design an outstanding new marketing campaign.
- D.** Figure out what the business' management wants to do.

Q035. The three phases of innovation project work, in sequence, are ____.

- A.** Discovery / Design / Delivery
- B.** Front End of Innovation / Mid Zone of Innovation / Back End of Innovation
- C.** Concept / Prototype / Production
- D.** Strategy / Execution / Pilot

Q036. Front End of Innovation (FEI) work is primarily about ____.

- A.** execution and commercialization
- B.** research, qualification, quantification, and initial definition
- C.** scaling production to market levels
- D.** post-launch monitoring and improvement

Q037. Mid Zone of Innovation (MZI) work centers primarily on ____.

- A.** strategizing, modeling, justification, and defense
- B.** research and need discovery
- C.** production, marketing, and channel sales
- D.** post-launch monitoring

Q038. Back End of Innovation (BEI) work is primarily about ____.

- A.** initial opportunity discovery
- B.** business case modeling
- C.** execution, implementation, and commercialization
- D.** perimeter scouting

Lesson 4 - Innovation's Design Outputs

Workbook reference: pp. 24-31 | 13 questions

Q039. Brand Innovation builds upon what three (3) elements of branding?

- A.** Brand Promise / Brand Message / Brand Language.
- B.** Brand Essence / Brand Ethos / Brand Ego.
- C.** Brand Persona / Brand Identity / Brand Statement.
- D.** Brand Oath / Brand Statement / Brand Imagery.

Q040. When does "Package Innovation" occur?

- A.** When a product is simply rebranded.
- B.** Through a new package design that creates perceived new value and appeals to consumer preferences, playing a vital role in brand messaging.
- C.** When a product is shipped in reusable containers.
- D.** When the supply chain is optimized.

Q041. Innovation's design outputs (the forms of 'what's new') can include innovations in ____.

- A.** products and services only
- B.** branding and marketing only
- C.** products, services, experiences, business models, processes, and more
- D.** patents only

Q042. Process Innovation is primarily concerned with ____.

- A.** new offerings sold to customers
- B.** new or improved business processes that change how work gets done internally
- C.** new advertising messages
- D.** new investor relations practices

Q043. Business Model Innovation involves ____.

- A.** creating a new offering at a better price
- B.** changing how the business creates, delivers, and captures value
- C.** patenting a new technology component
- D.** rebranding existing products

Q044. A new offering inside an existing category that 'substantially raises the bar' on what was available before is best described as ____.

- A.** Incremental Innovation
- B.** Breakthrough Innovation
- C.** Disruptive Innovation
- D.** Transformative Innovation

Q045. Experience Innovation focuses on innovating ____.

- A.** the way customers experience an offering across its full lifecycle

- B.** the legal contracts between business and customer
- C.** the financial relationship between buyer and seller
- D.** the manufacturing process exclusively

Q046. Marketing Innovation refers to ____.

- A.** any new product launched to market
- B.** new approaches to how a business markets its offerings (channels, messaging, positioning)
- C.** discount pricing campaigns
- D.** press releases

Q047. A business that introduces a new way of serving customers using existing technology in a novel arrangement is engaging in ____.

- A.** Service Innovation
- B.** Patent Innovation
- C.** Equity Innovation
- D.** Compliance Innovation

Q048. Which of the following is NOT a recognized form of innovation output?

- A.** Product Innovation
- B.** Process Innovation
- C.** Innovation in Customer Loyalty programs
- D.** Tax Avoidance Innovation

Q049. An innovation that re-engineers the steps in a manufacturing line to reduce defects is best classified as ____.

- A.** Product Innovation
- B.** Brand Innovation
- C.** Process Innovation
- D.** Marketing Innovation

Q050. Customer Loyalty Innovation focuses on ____.

- A.** increasing prices to repeat customers
- B.** creating innovative ways of building long-term customer commitment and repeat patronage
- C.** minimizing returns and refunds
- D.** switching customers between competitors

Q051. An innovation in how a business prices its offerings (e.g., subscription, pay-per-use, freemium) is most accurately classified as ____.

- A.** Product Innovation
- B.** Business Model Innovation
- C.** Process Innovation
- D.** Marketing Innovation

Lesson 5 - The Effective Innovator

Workbook reference: pp. 32-59 | 15 questions

Q052. In general, Innovators have a tendency to be highly ____, and as a result thoroughly enjoy experimenting.

- A. analytical
- B. intelligent
- C. curious
- D. extroverted

Q053. Generative activities like creative writing and constructive play are great ways for Innovation Professionals to do what?

- A. Expand the horizons of their imaginations.
- B. Sharpen their critical thinking skills.
- C. Improve their analytical thinking ability.
- D. Build their creativity muscles.

Q054. In relation to Brain Dominance, individuals with a Limbic orientation may be better suited for work in which phase of innovation work?

- A. Front End of Innovation.
- B. Mid Zone of Innovation.
- C. Back End of Innovation.
- D. None - the brain dominance orientation is irrelevant.

Q055. In relation to Personality Type, individuals with an objective orientation may be better suited for work in which phase of innovation work?

- A. Front End of Innovation.
- B. Mid Zone of Innovation.
- C. Back End of Innovation.
- D. None - the personality type is irrelevant.

Q056. Brain Dominance is generally understood as a spectrum running between ____.

- A. Limbic and Cerebral / right-brained and left-brained
- B. Visual and Verbal
- C. Introverted and Extroverted
- D. Concrete and Abstract

Q057. Cerebrally-oriented (left-brained) individuals tend to be better suited for ____.

- A. the imaginative work of the Front End
- B. the analytical and executorial work of the Back End
- C. marketing and storytelling
- D. user empathy interviews

Q058. A Personality Type characterized by a subjective orientation tends to be better suited for ____.

- A.** Front End of Innovation
- B.** Mid Zone of Innovation
- C.** Back End of Innovation
- D.** Quality Assurance only

Q059. Innovators have an insatiable desire for ____.

- A.** money
- B.** predictability
- C.** new knowledge and experience
- D.** comfort

Q060. Discovery Skills for innovators include behaviors such as Questioning, Observing, Networking, Experimenting, and ____.

- A.** Memorizing
- B.** Associating
- C.** Reciting
- D.** Authorizing

Q061. Mid Zone of Innovation work tends to favor which Brain Dominance orientation?

- A.** A balanced blend between Cerebral and Limbic
- B.** Strongly Limbic
- C.** Strongly Cerebral
- D.** Neither - Brain Dominance is irrelevant

Q062. Why does the workbook emphasize Brain Dominance and Personality Type for Innovation Teams?

- A.** So that managers can hire only one type of person
- B.** Because different phases of innovation work suit different orientations, and a balanced team is more effective
- C.** To enforce conformity in working style
- D.** Because they predict salary expectations

Q063. An individual fluent in Associating, Questioning, Observing, Networking, and Experimenting is showing the markers of ____.

- A.** a Discovery-skilled Innovator
- B.** a Six Sigma Black Belt
- C.** a Certified Public Accountant
- D.** a Project Management Professional

Q064. The Personality Type spectrum relevant to innovation work runs between ____.

- A.** Optimistic and Pessimistic
- B.** Subjective and Objective

- C.** Loud and Quiet
- D.** Conservative and Liberal

Q065. Effective innovators tend to be lifelong _____ - they read voraciously, attend conferences, and constantly seek to enlarge their mental models.

- A.** analysts
- B.** specialists
- C.** learners
- D.** instructors

Q066. If an Innovation Team is staffed entirely with Cerebrally-oriented members, the predictable risk is _____.

- A.** the team will get stuck in analysis and struggle with imaginative front-end work
- B.** the team will be too imaginative to execute
- C.** the team will move too quickly to brainstorming
- D.** no risk - Cerebral dominance is ideal for all phases

Lesson 6 - Creativity & Creativity Methods

Workbook reference: pp. 60-70 | 15 questions

Q067. Dr. Edward de Bono wrote the book Six Thinking Hats to give people a system for applying _____ via six colored hats.

- A. Brainstorming
- B. Lateral Thinking
- C. Design Thinking
- D. Oblique Examination

Q068. Studies have shown that more (not less) _____ make for better creativity and therefore more creative outcomes.

- A. people
- B. rules
- C. degrees of freedom
- D. constraints

Q069. What is the relevance of A More Beautiful Question by Warren Berger to creativity methods?

- A. Lateral Thinking
- B. SCAMPER Method
- C. Hypothesis Testing
- D. Question-Storming

Q070. What is the relevance of The Innovator's Hypothesis by Michael Schrage to creativity methods?

- A. Question-Storming
- B. Lateral Thinking
- C. SCAMPER Method
- D. Hypothesis Testing

Q071. Lateral Thinking, as described by de Bono, is best understood as _____.

- A. thinking sideways or around a problem to generate new approaches
- B. thinking only logically and sequentially
- C. thinking with a strict step-by-step methodology
- D. thinking with constant peer review

Q072. Creativity is best described in the workbook as _____.

- A. a rare gift only some people have
- B. the source of life for innovation
- C. a synonym for art only
- D. an unreliable input to be controlled

Q073. Creativity Methods include techniques like _____.

- A. Six Thinking Hats, SCAMPER, Mind Mapping, and Random Stimulus
- B. Six Sigma DMAIC and statistical control
- C. Profit & Loss accounting and break-even analysis
- D. Auditing and reconciliation

Q074. A practical reason that imposing constraints stimulates creativity is that ____.

- A. constraints reduce options to a manageable number
- B. constraints force the mind to bypass obvious solutions and seek novel paths
- C. constraints save money
- D. constraints prevent mistakes

Q075. The SCAMPER technique stimulates new ideas by prompting Substitute, Combine, Adapt, Modify, ____.

- A. Put to other use, Eliminate, Reverse
- B. Plan, Execute, Review
- C. Print, Explain, Re-route
- D. Polish, Edit, Re-make

Q076. Random Stimulus as a creativity technique is intended to ____.

- A. force teams to use templated thinking
- B. inject an unrelated input to break habitual thinking patterns
- C. minimize new ideas
- D. filter only highly relevant inputs

Q077. Why is it important for Innovation Professionals to exercise their creativity 'muscles' regularly?

- A. Because creativity declines with disuse and grows with practice
- B. Because they are paid by the hour for creative output
- C. Because regulators require it
- D. Because it intimidates competitors

Q078. The Six Thinking Hats by de Bono provides each thinker with ____.

- A. a single dominant role to play for the whole session
- B. six distinct thinking modes (e.g., facts, feelings, optimism, caution, creativity, process) the group rotates through
- C. rigid voting weights for decision-making
- D. an organizational chart for the project

Q079. Mind Mapping is a Creativity Method that helps innovators ____.

- A. enforce hierarchical decision rights
- B. visually branch related ideas outward from a central concept to expose new connections
- C. rank ideas by ROI
- D. track project schedule dependencies

Q080. A culture of psychological safety is important to creativity primarily because ____.

- A.** it shields innovators from accountability
- B.** people only share unconventional ideas when they feel safe doing so
- C.** it eliminates the need for evaluation
- D.** it speeds up decision making

Q081. Imposing a 'wild idea' rule in a creative session is intended to ____.

- A.** encourage participants to volunteer ideas they'd otherwise self-censor
- B.** limit input to only the most senior staff
- C.** prevent the group from documenting outputs
- D.** speed up convergence on a final answer

Lesson 7 - Ideation & Brainstorming

Workbook reference: pp. 71-81 | 17 questions

Q082. In most cases, the ideal group size for a brainstorming session is ____ people.

- A. 8 - 12
- B. 2-5
- C. 6-8
- D. 14 - 20

Q083. What does the term "innoganda" refer to in the context of brainstorming misuse?

- A. A type of structured ideation.
- B. Using "brainstorming sessions" for posturing, to create the appearance of being creative.
- C. A method for evaluating ideas.
- D. A tool for market research.

Q084. In a brainstorming session, what is the role of the "Facilitator"?

- A. To generate most of the ideas.
- B. To judge ideas and select the best ones.
- C. To establish rules, set direction, maintain energy, keep everyone on topic, and ensure the session runs as intended.
- D. To visually capture ideas.

Q085. Ideation differs from Brainstorming primarily in that ____.

- A. they are the same thing
- B. Ideation is the broader generative activity; Brainstorming is one specific structured technique within it
- C. Brainstorming is for executives only
- D. Ideation cannot occur in groups

Q086. One of the four classical brainstorming rules - established by Alex Osborn - is ____.

- A. aim for quantity of ideas, not quality
- B. evaluate every idea immediately
- C. only one person speaks at a time during the whole session
- D. no participation from junior staff

Q087. 'Withholding judgment' during brainstorming exists because ____.

- A. early criticism shuts down the flow of ideas
- B. the team won't have time to evaluate later
- C. the facilitator is forbidden from speaking
- D. evaluation requires no skill

Q088. Brainstorming is most effective when ____.

- A. there is no time limit

- B.** there is a clear, well-framed prompt or 'How might we...' question
- C.** all participants are senior managers
- D.** ideas are anonymized and scored

Q089. Brainwriting differs from classical brainstorming in that ____.

- A.** it requires only one participant
- B.** participants write ideas silently and then exchange or build on them, reducing groupthink
- C.** it eliminates the need for a facilitator
- D.** it always happens online

Q090. Encouraging participants to 'build on' others' ideas during brainstorming is intended to ____.

- A.** limit individual credit for ideas
- B.** create combinatorial richness and idea evolution
- C.** speed up convergence toward a vote
- D.** minimize the number of total ideas

Q091. A common reason brainstorming sessions underperform is ____.

- A.** too small a group
- B.** the prompt is too open-ended or too narrow
- C.** too much creative energy
- D.** the facilitator is too neutral

Q092. After a brainstorming session, the next typical step is ____.

- A.** immediately commercializing the most popular idea
- B.** clustering related ideas (e.g., via Affinity Analysis) and shortlisting for further development
- C.** discarding all ideas and starting over
- D.** submitting all ideas to legal review

Q093. Why are diverse participants important in brainstorming?

- A.** Diversity creates a quota requirement
- B.** Diversity of perspective increases the breadth and originality of ideas generated
- C.** Diverse groups always agree faster
- D.** Diversity reduces the need for a facilitator

Q094. Anonymized ideation tools (e.g., digital idea boards where contributors are hidden) are valuable mainly because ____.

- A.** they reduce social pressure and encourage candid contributions
- B.** they make ideation cheaper
- C.** they hide creativity from the facilitator
- D.** they enable performance reviews

Q095. A trained facilitator in brainstorming is responsible for ____.

- A.** evaluating each idea's commercial merit on the spot

- B.** managing flow, enforcing the rules of brainstorming, and capturing every idea
- C.** limiting the conversation to senior staff
- D.** writing the final business plan

Q096. Setting a time-boxed ideation sprint (e.g., 30 minutes) is generally preferred over open-ended sessions because _____.

- A.** it limits creativity
- B.** time pressure focuses attention and prevents over-deliberation
- C.** it costs less in supplies
- D.** people lose interest in less than 5 minutes

Q097. 'How might we...' as a problem prompt format is widely used because _____.

- A.** it bakes in a specific solution
- B.** it invites optimism, ownership, and divergent exploration of the problem
- C.** it limits answers to yes/no
- D.** it requires participants to be experts

Q098. Why is groupthink particularly dangerous in brainstorming?

- A.** It produces too many ideas
- B.** It causes the group to converge prematurely on a single approach, suppressing diversity of thought
- C.** It eliminates the need for a facilitator
- D.** It only affects junior team members

Lesson 8 - Oblique Examination

Workbook reference: pp. 82-103 | 11 questions

Q099. To ensure a holistic 360° view in using the Oblique Examination process, a team must try to use what two different perspectives, as the differences between them can produce different insights and highlight different challenges?

- A. that of the shareholder and that of the customer (or market)
- B. that of the buyer and that of the seller
- C. that of the investor and that of the business
- D. that of the customer (or market) and that of the business

Q100. What is the primary purpose of Step 5 (Incubation & Selection) in the Breakthrough Innovation Method (BrInM)?

- A. To brainstorm a wide range of new value models.
- B. To build out select value models through research and analyses, compile findings into a straw-man business plan, and decide whether to advance them.
- C. To launch full-scale commercialization of new innovations.
- D. To discontinue underperforming projects.

Q101. In Step 6 (Realization) of BrInM, achieving realization typically involves:

- A. Running pilots to validate customer demand before scaling.
- B. Preparing initial sketches of the business case only.
- C. Completing Mid Zone work and developing a formal business plan for approval of full design, development, and commercialization.
- D. Returning to the ideation stage to refine opportunity spaces.

Q102. The Breakthrough Innovation Method that GInI teaches centers on ____.

- A. Six Sigma
- B. Oblique Examination
- C. Lean Startup
- D. Total Quality Management

Q103. Why is Oblique Examination called 'oblique'?

- A. Because it involves looking at problems at an angle, not directly
- B. Because it is conducted by a person named Oblique
- C. Because it is confidential
- D. Because it uses geometric calculations

Q104. The goal of Oblique Examination is to ____.

- A. confirm what the team already believes
- B. uncover non-obvious insights that lead to breakthrough innovation
- C. shortcut the research process
- D. validate competitor strategies

- Q105.** Looking only at problems from the business's own perspective tends to produce ____.
- A.** incremental innovation, since the business sees only what it already understands
 - B.** breakthrough innovation automatically
 - C.** disruptive innovation in every case
 - D.** transformative innovation guaranteed
- Q106.** Examining problems only from the customer's perspective tends to produce ____.
- A.** the optimal innovation in every case
 - B.** outputs that may not be commercially viable for the business
 - C.** purely cost-driven innovation
 - D.** innovations that satisfy investors first
- Q107.** Oblique Examination is therefore an exercise in ____.
- A.** disagreement avoidance
 - B.** synthesis between the customer/market view and the business view
 - C.** outsourcing decisions to a third party
 - D.** delaying decisions until certainty
- Q108.** A team that consistently uses Oblique Examination should expect to identify ____.
- A.** opportunities for breakthrough or disruptive innovation more often than competitors who do not
 - B.** fewer opportunities than competitors
 - C.** only incremental product variations
 - D.** no actionable opportunities at all
- Q109.** Where in the innovation project lifecycle is Oblique Examination most useful?
- A.** Front End of Innovation - during opportunity exploration
 - B.** Back End of Innovation - during launch
 - C.** After commercialization - during post-launch monitoring
 - D.** Only in finance reviews

Lesson 9 - Running Innovation Projects

Workbook reference: pp. 104-158 | 36 questions

Q110. Further validating & scoping an opportunity in the Front End of a project allows for a level of intermediate vetting among projects, with the aim of eradicating errant assumptions and thereby ensuring each opportunity ____.

- A.** Has political buy-in and support behind it.
- B.** Makes strategic and financial sense for the business to continue pursuing.
- C.** Satisfies all stakeholders in the business and has no objections from anywhere.
- D.** Makes sense from a branding and marketing perspective for the business to continue pursuing.

Q111. In transitioning a project from the Front End to the Mid Zone, whether an organization opts to use the same team, a modified team, an expanded team, or an entirely different team will depend largely what factors in the business?

- A.** Its organizational structures, executional priorities, and available resources.
- B.** Its project structures, strategic priorities, and committable resources.
- C.** Its organizational infrastructure, executional aspirations, and extended resources.
- D.** Its political structures, operational priorities, and free resources.

Q112. The fifth step for projects in the Mid Zone is typically for teams to pitch the new opportunity they've been working on to a formal Selection Committee. To do this, teams will often use what to support their pitch?

- A.** A high-ranking executive.
- B.** A Business Plan Pro Forma.
- C.** A Pitch Deck.
- D.** A play script.

Q113. For projects in the Back End of Innovation, the actual type and scale of pilot conducted will depend on the particular business and industry. In some cases a ____ may be used, but in other cases, especially where avoiding brand erosion is important a more well-developed version of the offering may be trialed.

- A.** simulation of the product
- B.** lowest-effort product
- C.** minimum viable product
- D.** least-offensive product

Q114. For projects in the Back End that have run a pilot, being able to make specific go-forward recommendations to the business' decision-makers requires a team to be what?

- A.** Very critical.
- B.** Very objective.
- C.** Very secretive.
- D.** Very optimistic.

Q115. What is the primary purpose of stress-testing at each stage of an innovation project?

- A.** To accelerate commercialization by bypassing uncertain stages.
- B.** To ensure each decision aligns with the brand without considering the market.
- C.** To validate that the problem, solution, offering, and strategy are real and viable.
- D.** To delay potential failure until after the product is launched.

Q116. According to the "fail fast / fail early" philosophy, how can success be defined for an innovation team?

- A.** Delivering the project to market regardless of challenges.
- B.** Forcing weak charters to fail early so resources can be redirected to stronger opportunities.
- C.** Avoiding failure by continuing with inconclusive experiments indefinitely.
- D.** Ensuring all stakeholders interpret experimental results in the same way.

Q117. Which of the following best describes the purpose of finalizing the development plan in the Back End of Innovation?

- A.** To create a high-level vision without specific timelines or budgets.
- B.** To summarize prior research without committing to operational steps.
- C.** To detail all research, technical, operational, and commercial steps, including a timeline and budget, ensuring the project can reach its milestone successfully.
- D.** To focus only on marketing and sales aspects of the innovation.

Q118. The Front End of Innovation produces, as its primary output, _____.

- A.** a finished product ready to ship
- B.** an articulated opportunity with a validated problem and a candidate solution direction
- C.** a quarterly P&L statement
- D.** a fully-staffed manufacturing line

Q119. An early step in the Front End of Innovation is to _____.

- A.** place purchase orders for tooling
- B.** identify an unmet, ill-met, or emerging need in the market or business
- C.** draft the press release
- D.** sign supplier contracts

Q120. A team's Point of View in the Front End of Innovation captures _____.

- A.** the team's preferred marketing slogan
- B.** the team's distilled understanding of the real problem it intends to solve
- C.** the team's pricing strategy
- D.** the team's manufacturing plan

Q121. Design Principles, in the FEI, define _____.

- A.** the constraints and qualities the solution must satisfy to address the problem
- B.** the company's HR policies
- C.** the visual identity of the brand

D. the regulatory limits in the industry

Q122. In FEI, before the team ideates solutions, it should first ____.

- A.** jump straight to brainstorming
- B.** establish the Point of View and Design Principles
- C.** secure intellectual property protection
- D.** hire production engineers

Q123. In FEI, the question of whether the team's findings 'reflect a problem worth solving for the business' is typically answered by ____.

- A.** a marketing campaign
- B.** early financial analysis
- C.** a customer survey
- D.** a press release

Q124. At the end of FEI, the team typically reaches a ____.

- A.** full-rate production decision
- B.** phase-gate milestone review (go / pivot / no-go)
- C.** first revenue booking
- D.** patent filing decision

Q125. Mid Zone work primarily produces ____.

- A.** a finished product
- B.** a formal business case/business plan, go-to-market strategy, and detailed business model
- C.** marketing collateral
- D.** investor pitch slides only

Q126. A typical MZI step is to develop ____.

- A.** a detailed go-to-market strategy for the new solution
- B.** raw materials inventory
- C.** a press release
- D.** the corporate org chart

Q127. Throughout MZI, the team will face ____.

- A.** a single, irreversible decision
- B.** additional phase-gate milestone reviews with go / pivot / no-go decisions
- C.** no decisions until launch
- D.** only post-launch reviews

Q128. Back End of Innovation work covers ____.

- A.** pre-need discovery
- B.** the formal design, development, testing, piloting, and commercialization of the new offering

- C. only marketing
- D. only quality assurance

Q129. A typical BEI step is to ____.

- A. scout for emerging market trends
- B. develop the hard criteria (functional, aesthetic, experiential, brand, financial) for the new offering
- C. draft the original problem statement
- D. conduct the first user interviews

Q130. Pilots in BEI are typically used to ____.

- A. lock in the offering's price for life
- B. validate the offering and its commercial readiness at a controlled scale before full launch
- C. patent the technology
- D. test the marketing budget

Q131. Post-commercialization monitoring typically runs for ____.

- A. 3+ years post-launch
- B. 30 days
- C. 1 week
- D. until the next quarterly board meeting only

Q132. An important practice during post-commercialization is to ____.

- A. disband the team immediately and erase its history
- B. feed lessons learned back into the business' innovation process
- C. stop tracking all metrics
- D. transfer the project to legal

Q133. Across all three phases, phase-gate reviews are used to ____.

- A. audit team expenses only
- B. make go / pivot / no-go decisions based on the team's progress against criteria
- C. rotate team members
- D. rename the project

Q134. If a project fails to meet phase-gate criteria, what is the typical outcome?

- A. It proceeds on to the next phase automatically
- B. It is either redefined into a different project, combined with another project, or terminated
- C. It moves on since milestone reviews are just check-in-the-box
- D. It is terminated along with the team working on it

Q135. In FEI, before the team begins prototyping solutions, it must develop ____.

- A. a complete patent portfolio
- B. a test plan that reflects realistic usage of solutions against the Point of View and constraints

- C. the press release
- D. the manufacturing line

Q136. Why does FEI typically employ business experiments?

- A. To make the project look scientific
- B. To test hypotheses about the problem and converge on the most accurate problem statement
- C. To replace customer research entirely
- D. To eliminate the need for prototypes

Q137. A 'final solution statement' produced in FEI captures ____.

- A. the marketing tagline
- B. the team's chosen path forward - the best solution based on test findings - possibly a hybrid
- C. the cost of goods sold
- D. the regulatory clearance plan

Q138. 'Circle back and repeat certain steps if required' appears explicitly across FEI, MZI, and BEI because ____.

- A. the innovation process is meant to be linear with no rework
- B. innovation work is iterative and findings often require revisiting earlier steps
- C. rework is a sign of failure
- D. it is a contractual obligation

Q139. The team transitioning from FEI to MZI typically ____.

- A. dissolves and is replaced by a different team
- B. may be the same team, a modified team, an expanded team, or an entirely different team - depending on the business' structures, executional priorities, and available resources
- C. is rotated quarterly regardless of project state
- D. is always identical to the FEI team

Q140. The level of confidence in project metrics (e.g., market size, revenue) early in FEI tends to be ____.

- A. very high - measurable from day one
- B. relatively low, due to the uncertainty inherent at the Front End
- C. irrelevant
- D. guaranteed by independent audit

Q141. An MVP (Minimum Viable Product) is described in the workbook as ____.

- A. a fully featured launch product
- B. a low-effort version of an offering used in some BEI pilot situations
- C. a marketing concept only
- D. a tool exclusive to FEI

Q142. Why might a business choose NOT to use a Minimum Viable Product for its pilot?

- A.** MVPs are illegal
- B.** Where avoiding brand erosion is important, a more well-developed version is preferred to protect the brand
- C.** MVPs always cost more than full products
- D.** Customers can't perceive MVPs

Q143. Across all phases, the activity that primarily distinguishes successful innovation projects from failed ones is ____.

- A.** the speed of execution alone
- B.** the quality of insights gathered and the discipline of testing them
- C.** the size of the budget
- D.** the seniority of the team

Q144. 'Compensatory behaviors' observed in customers during research are valuable to FEI teams because ____.

- A.** they fill out market research surveys faster
- B.** they reveal workarounds customers invent to overcome a shortcoming - pointing to unmet needs and opportunity
- C.** they speed up the patent process
- D.** they reduce sample size requirements

Q145. In the FEI, the team typically transitions from divergent exploration to convergent definition by ____.

- A.** running business experiments to test hypotheses and selecting the most accurate one
- B.** voting by simple majority
- C.** deferring to the senior executive's preference
- D.** outsourcing the decision to consultants

Lesson 10 - Research in Innovation

Workbook reference: pp. 159-214 | 38 questions

Q146. When distilling our research findings, we generally observe patterns emerge. These patterns tend to yield two types of signals, namely ____.

- A. strong and weak
- B. large and small
- C. fast and slow
- D. up and down

Q147. Design Research can be thought of as the ____ aspect of innovation.

- A. anthropopathic
- B. anthropocentric
- C. anthropomorphic
- D. anthropometric

Q148. Market Research came into being because of a shift in power away from producers and toward consumers, thus producers needed to understand what?

- A. What consumers wanted and didn't want.
- B. Why consumers preferred one option over the other.
- C. What consumers' underlying needs and motivations were.
- D. All of the above.

Q149. Market Research attempts to study what to yield useful new insights into a situation?

- A. New economic theories.
- B. Geopolitical trends and events.
- C. Interested individuals.
- D. Markets in the aggregate.

Q150. ____ involves actively going out and looking for certain trends, not simply observing trends passively, with the intention of developing insights into new directions that may alert the business to new opportunities.

- A. Trend Watching
- B. Trend Scouting
- C. Trendcasting
- D. Scenario Planning

Q151. Analysts who carry out Futuring work are generally known as Futurists. Those who use predictive algorithms to augment their work are known as what?

- A. Mathematical Analysts.
- B. Perceptual Futurists.
- C. Quantitative Futurists.
- D. Statistical Actuaries.

Q152. Any new opportunity must align with _____ if it is to have line of sight into being able to pursue the opportunity.

- A.** what the business feels will be safe
- B.** what the business is capable of pursuing and delivering
- C.** what government regulators are prepared to allow the business to do
- D.** what the business is willing to "bet the farm" on

Q153. Technology Scouting can be used by highly market-driven businesses focused on a single market, who have a narrow field of view around the technologies used in that market, and thus need new technology so they can _____.

- A.** raise the bar on the value they are delivering to that market
- B.** ensure they are more advanced and innovative than their competitors
- C.** at least appear innovative to their customers
- D.** get out of that market

Q154. The market intelligence gathered from a business' Listening Posts would subsequently be _____ so that various decision-makers can use it for a more responsive form of strategic planning.

- A.** disseminated throughout the business
- B.** filed away for future reference
- C.** shared selectively with top executives having a "need to know"
- D.** posted on the business' web site

Q155. Which of the following best describes the main limitation of trendcasting?

- A.** It is too expensive to implement across multiple industries.
- B.** It can only be applied to Horizon 1 innovations.
- C.** It is speculative and subject to error due to complex interactions of PESTEL forces.
- D.** It eliminates the need for scenario planning.

Q156. Which of the following best describes the purpose of brand tracking as a type of market research?

- A.** To measure the effectiveness of employee engagement programs.
- B.** To track the impact of advertising placements on brand recall.
- C.** To analyze the technical performance of a website.
- D.** To predict the financial performance of a new product.

Q157. What is the main purpose of social media listening in market research?

- A.** To design new social media platforms for innovation projects.
- B.** To parse large volumes of discussions to identify emerging patterns around brands.
- C.** To train employees in using digital marketing tools.
- D.** To forecast long-term technological megatrends.

Q158. What is a key advantage of conducting qualitative market research through fieldwork rather than online methods?

- A.** It reduces the cost of data collection significantly.

- B.** It captures real-time, in-context consumer reactions that can later be reviewed by a wider team.
- C.** It guarantees consensus among participants.
- D.** It eliminates the need for video recordings.

Q159. In quantitative market research, what is one way survey techniques can be especially useful for innovators?

- A.** Measuring customer resonance with a new value proposition when it is clearly explained.
- B.** Recording spontaneous consumer reactions at public events.
- C.** Tracking where consumers' eyes move while browsing a website.
- D.** Allowing participants to influence one another's responses.

Q160. What is the primary purpose of "needfinding" in innovation management?

- A.** To generate marketing campaigns for existing products.
- B.** To discover new opportunities that represent real problems worth solving for the business and its markets.
- C.** To evaluate employee engagement levels within the organization.
- D.** To track customer sentiment on social media.

Q161. In the context of Innovation Hunting Grounds, what do the "two sides of the coin" represent?

- A.** Internal research versus external consulting.
- B.** Short-term profits versus long-term growth.
- C.** Strategic alignment with business goals and opportunistic exploration of white space.
- D.** Quantitative versus qualitative research methods.

Q162. What is the limitation of "Trend Watching" for forward-looking insights?

- A.** It is too expensive.
- B.** It focuses on long-term predictions.
- C.** It often reports what has already emerged, rather than what is genuinely new.
- D.** It relies solely on internal data.

Q163. What are "Listening Posts" in the context of research?

- A.** Public opinion surveys.
- B.** Online discussion forums.
- C.** Special insights-gathering offices set up in strategically important urban centers to stay abreast of happenings and trends.
- D.** Internal feedback mechanisms.

Q164. What is the goal of "Opportunity Analysis"?

- A.** To profile a specific market segment.
- B.** To consider how the world is changing around a business and how those changes impact its business model, with the intent to shape future strategies.
- C.** To conduct competitive benchmarking.
- D.** To evaluate past project performance.

- Q165.** What is the aim of "Acquisition Scouting"?
- A.** To find new technologies.
 - B.** To uncover new markets.
 - C.** To identify mature and established businesses—rather than startups—for potential acquisition or merger that provide strategic value.
 - D.** To license intellectual property.
- Q166.** User Research can be thought of as the ____ aspect of innovation.
- A.** anthropological
 - B.** anthropomorphic
 - C.** anthropopathic
 - D.** anthropometric
- Q167.** Primary Research is best described as ____.
- A.** research another party has conducted and published, which the business accesses
 - B.** research the business itself undertakes, customized to a specific insight it needs
 - C.** interviews of senior executives only
 - D.** literature reviews
- Q168.** Secondary Research is best described as ____.
- A.** research conducted by another party that the business can access and use
 - B.** the second wave of an internal study
 - C.** research conducted only after launch
 - D.** research conducted by interns
- Q169.** Businesses generally use Secondary Research as much as they can because ____.
- A.** it is more accurate than Primary Research
 - B.** it is typically far more cost-effective than generating their own Primary Research
 - C.** it is always more timely
 - D.** it requires no analysis
- Q170.** 'Thick Data' (as coined by Tricia Wang) refers to ____.
- A.** large quantitative datasets
 - B.** high-quality qualitative data that adds context Big Data alone cannot
 - C.** data that is unverified
 - D.** raw transaction logs
- Q171.** User Research methods include ____.
- A.** Business Ethnography, Contextual Inquiry, Simulated User Scenarios, Focus Groups
 - B.** PESTEL Analysis
 - C.** Stress Testing
 - D.** Scenario Planning
- Q172.** Design Research methods include ____.

- A.** Business Ethnography and Focus Groups
- B.** PESTEL Analysis and Stress Testing
- C.** User Experience Studies, Human-Machine Interface Studies, Ergonomics & Human Factors Studies, Customer Experience Studies
- D.** Sentiment Analysis only

Q173. PESTEL Analysis stands for ____.

- A.** Political, Economic, Societal, Technological, Environmental, Legal
- B.** Population, Economic, Social, Theological, Educational, Legal
- C.** Political, Ecological, Statistical, Technical, Environmental, Logical
- D.** Public, Economic, Social, Technological, Educational, Legal

Q174. Together, the forward-looking research methods (Trend Watching, Trend Scouting, PESTEL Analysis, Trendcasting, Scenario Planning, Stress Testing, Futuring) are used to create ____ in a business.

- A.** Strategic Foresight
- B.** Tactical Insight
- C.** Operational Excellence
- D.** Competitive Pressure

Q175. A Megatrend is best described as ____.

- A.** a fad lasting less than a year
- B.** a massive, sweeping world trend that substantially influences smaller trends in its path
- C.** a daily news cycle event
- D.** a quarterly earnings adjustment

Q176. Scenario Planning is best used to ____.

- A.** predict a single most likely future
- B.** lay out multiple potential future scenarios and assess what each could mean for the business
- C.** verify the past performance of competitors
- D.** rank ideas in a brainstorming session

Q177. Stress Testing requires Scenario Planning as a prerequisite because ____.

- A.** Stress Testing tests strategies against the scenarios Scenario Planning produced
- B.** Scenario Planning produces no useful output without Stress Testing
- C.** Stress Testing replaces Scenario Planning
- D.** Stress Testing is conducted by a different team only

Q178. Hard Research primarily encompasses ____.

- A.** User and Market Research
- B.** Technology R&D and IP Research
- C.** Branding and Marketing Research
- D.** Storytelling and Empathy Mapping

Q179. Hard Research is generally conducted by ____.

- A.** various types of Scientists and Engineers
- B.** marketing copywriters
- C.** user experience designers
- D.** human resources managers

Q180. An online survey of 3,000 individuals targeting statistical significance is an example of ____.

- A.** Qualitative Market Research
- B.** Quantitative Market Research
- C.** Hard Research
- D.** Trend Scouting

Q181. Focus Groups are a ____ research method.

- A.** User Research
- B.** Hard Research
- C.** Trend Scouting
- D.** Stress Testing

Q182. A practical limitation of Focus Groups is ____.

- A.** they always produce statistically significant results
- B.** participants can only relate context they already know (their past history) and may not reveal the real problem; groupthink and social pressure biases also affect them
- C.** they cannot be video-recorded
- D.** they have no use in innovation

Q183. A practical limitation of Trend Watching is ____.

- A.** trends cannot be observed
- B.** trends can only be read in the present, not the future - they should not be mistaken for a crystal ball
- C.** trends require statistical significance
- D.** trends are illegal in some industries

Lesson 11 - Design Thinking

Workbook reference: pp. 215-253 | 20 questions

Q184. One of the key reasons Design Thinking is so powerful is that it allows us to deliver solutions that do what?

- A. Make more money.
- B. Cost us less to deliver.
- C. Satisfy our business strategy.
- D. Resonate with users.

Q185. The first step in the Design Thinking process is "naming the problem" around some ____.

- A. really big customer issue
- B. emerging market trend
- C. unmet need or outcome
- D. unresolved business issue

Q186. In the fourth major step of the Design Thinking process, the "Ideate" activity is what type of activity?

- A. Convergent
- B. Divergent
- C. Evaluative
- D. Static

Q187. In the context of Design Thinking, prototyping ____.

- A. should complement our Design Methods
- B. must be completed prior to engaging in Design Methods
- C. should augment some of the things we do
- D. must permeate everything we do

Q188. Design Thinking's undergirding philosophy is ____.

- A. Lean Startup
- B. Six Sigma
- C. Human-Centered Design
- D. Total Quality Management

Q189. The Double-Diamond model - used to represent the Design Thinking process - was originally conceived by ____.

- A. IDEO in 1991
- B. the British Design Council in 2005
- C. Stanford d.school in 1980
- D. MIT Media Lab in 2010

Q190. The Design Thinking process has five major stages and a total of ____ action steps.

- A. five
- B. seven
- C. nine
- D. twelve

Q191. The second step of Design Thinking - Clarify the Problem - uses _____ to formulate hypotheses about the true nature of the problem.

- A. convergent thinking
- B. divergent thinking
- C. static thinking
- D. linear thinking

Q192. Within step 2 of Design Thinking, the team converges on the best hypothesis by _____.

- A. voting silently
- B. running business experiments to test the hypotheses
- C. deferring to the most senior person
- D. asking marketing

Q193. Problem reframing is a fundamental necessity in Design Thinking because _____.

- A. all problems are originally framed correctly
- B. most problems as first encountered are ill-framed and need restating at the right level of human need
- C. reframing speeds up production
- D. marketing teams require it

Q194. The 'elevator wait time' example illustrates problem reframing because the team _____.

- A. made the elevator faster
- B. changed the customer psychology of the wait (mirrors, music, hand sanitizer) rather than the speed
- C. increased the price of riding
- D. replaced the elevator with stairs

Q195. Empathy in Design Thinking is best understood as _____.

- A. a feeling of pity for customers
- B. deep immersion in the user's situation so as to understand the world from their perspective
- C. a marketing strategy
- D. an HR competency

Q196. Design Thinking was largely developed in the 1980s and 1990s at _____, with David Kelley later adapting it to business and founding IDEO in 1991.

- A. MIT
- B. Stanford University
- C. Harvard Business School

D. Carnegie Mellon

Q197. The 12 Purposes for Prototyping in Design Thinking include ____.

- A.** Build to Learn, Build to Empathize, Build to Communicate, Build to Inspire
- B.** Build to Sell, Build to Patent, Build to Profit, Build to Audit
- C.** Build to Promote, Build to Approve, Build to File, Build to Reject
- D.** Build to Hire, Build to Recruit, Build to Vote, Build to Outsource

Q198. 'Build to Empathize' prototypes are used to ____.

- A.** validate technical performance
- B.** develop an understanding of the customer's world / situation / problem
- C.** secure intellectual property
- D.** set retail pricing

Q199. 'Wizard of Oz' prototypes are used to ____.

- A.** test functionality where some aspect has been faked, before fully producing that functionality
- B.** validate financial performance
- C.** patent a process
- D.** rehearse the press release

Q200. 'Looks-Like' prototypes are intended to ____.

- A.** simulate the appearance of a real item without full functionality
- B.** deliver full functional performance
- C.** stand in as a finished product
- D.** test internal manufacturing

Q201. 'Works-Like' prototypes are intended to ____.

- A.** provide the full functionality of a real system, possibly via the same mechanisms
- B.** simulate only the look
- C.** skip prototyping altogether
- D.** test marketing slogans

Q202. Paper Prototypes are most valuable when ____.

- A.** a team is in the final manufacturing stage
- B.** a team needs to quickly explore and evaluate concepts together with little cost and no risk
- C.** a regulator requires them
- D.** a team wishes to mass-produce

Q203. Prototype fidelity should generally be ____.

- A.** as high as possible at all times
- B.** commensurate with the needs at the team's current stage - low early, high late
- C.** always low
- D.** set by regulators

Lesson 12 - The Innovation Manager

Workbook reference: pp. 254-257 | 8 questions

Q204. An Innovation Manager will generally serve in one of two roles in the business, namely ____.

- A.** Innovation Project Leader or Innovation Program Leader
- B.** Innovation Project Team Member or Innovation Program Assistant
- C.** Innovation Mentor or Innovation Champion
- D.** Innovation Fire Fighter or Innovation Provocateur

Q205. Innovation Managers are best described in the workbook as ____.

- A.** the executive sponsors of the program
- B.** the first line of leadership in driving the business' innovation program forward
- C.** external consultants only
- D.** the regulatory contacts for the program

Q206. Project Leaders' tasks differ from Program Leaders' tasks in that Project Leaders ____.

- A.** focus on specific innovation projects from start to finish
- B.** drive enterprise-wide engagement only
- C.** manage HR for the innovation team
- D.** do not interact with phase-gates

Q207. Program Leader Task 1 (driving engagement) calls for which type of leader?

- A.** A regulatory enforcer
- B.** A resourceful leader and enthusiastic cheerleader
- C.** A reluctant participant
- D.** A silent observer

Q208. Program Leader Task 2 (evaluation & selection) calls for a broad mix of skills, primarily ____.

- A.** open-mindedness, diplomacy, business acumen, objectivity, upward influence
- B.** showmanship, persuasion, and aggression
- C.** technical certification only
- D.** memorization and recall

Q209. A Project Leader must master 'selling' or 'evangelism' because ____.

- A.** they have a sales quota
- B.** they often have to sell the project across the business, including to individuals higher in the organization
- C.** the project must be sold to customers directly by them
- D.** they receive sales commission

Q210. Why might an Innovation Manager oscillate between Project Leader and Program Leader roles?

- A.** The two roles are functionally identical
- B.** Because needs in the business shift, and one manager may be best-positioned to cover both at different times
- C.** Because the titles are interchangeable on the business card
- D.** Because regulators require both

Q211. A useful background for an effective Project Leader is _____.

- A.** only an MBA
- B.** having participated in numerous past innovation projects
- C.** a marketing certification only
- D.** a regulatory law degree

Lesson 13 - Core Innovation Teams

Workbook reference: pp. 258-266 | 10 questions

Q212. Good Innovation Teams will have a well-balanced mix of which of the following?

- A.** Brain dominance patterns and personality types.
- B.** Discovery skills.
- C.** Hard innovation skills.
- D.** All of the above.

Q213. Which types of innovation are the projects that Core Innovation Teams run most often focused on?

- A.** Product and Process.
- B.** Sustaining and Incremental.
- C.** Breakthrough and Disruptive.
- D.** Transformative and Reinventive.

Q214. Core Innovation Teams typically include four role types: Innovation Professionals, Innovation Strategists, certain Innovation/Technical Specialists, and _____.

- A.** a Chief Marketing Officer
- B.** an Innovation Manager
- C.** a Chief Financial Officer
- D.** an HR Business Partner

Q215. The recommended maximum size for a Core Innovation Team is _____.

- A.** 20+ members
- B.** 6 - 7 members
- C.** 1 - 2 members
- D.** 12 - 15 members

Q216. A defining characteristic of Core Innovation Teams is that _____.

- A.** they work on dozens of projects in parallel
- B.** they typically take on only one project at a time
- C.** they only ever do Horizon 1 work
- D.** they always report to legal

Q217. Roles that operate at the periphery of Core Innovation Teams (engaging as needed) include _____.

- A.** Innovation Facilitators, Innovation Mentors, and Innovation Mavericks
- B.** Sales Representatives, Field Service Engineers, and Tax Accountants
- C.** Investor Relations Managers, Auditors, and Lawyers
- D.** Janitors and Receptionists

Q218. Micro-managing a Core Innovation Team is _____.

- A.** a recommended best practice
- B.** a surefire way to squelch creativity and quality of work
- C.** required by GInI standards
- D.** irrelevant to outcomes

Q219. A well-built Core Innovation Team will include dreamers, designers, strategists, and ____.

- A.** lawyers
- B.** doers
- C.** auditors
- D.** subcontractors

Q220. Core Innovation Teams are sometimes housed within ____.

- A.** a centralized innovation function, but they can also belong to specific functional groups or business units
- B.** the legal department only
- C.** the marketing department only
- D.** the IT helpdesk

Q221. The personality 'shape' of a high-functioning Core Innovation Team is best described as ____.

- A.** a collection of homogeneous specialists
- B.** a collection of 'rare breeds' with a balanced mix of styles - including some true mavericks
- C.** all engineers, no others
- D.** all marketers, no others

Lesson 14 - Project Leader

Workbook reference: pp. 267-310 | 7 questions

Q222. In leading their team in addressing the opportunity it has been tasked to pursue, the Project Leader must guide his or her team in developing its _____, which will take into consideration such things as the business-customer relationships involved, the markets being targeted, the speed of those markets, the technological leaps being considered, and the types and scopes of innovation being considered.

- A. Problem Solving Plan
- B. Plan of Attack
- C. Statement of Principles
- D. White Space Prospectus

Q223. Project Leaders should be _____ thinkers - they have a desire for understanding how all the parts and pieces of something work together.

- A. Linear / Sequential
- B. Integrative / Associative
- C. Hierarchical / Directive
- D. Reductive / Analytical only

Q224. When a business' innovation program is new, Project Leaders should _____.

- A. take on only Horizon 3 transformative bets
- B. start small with simple Horizon 1 projects to find early wins before bigger charters
- C. decline all projects until the program matures
- D. outsource everything to consultants

Q225. On a tactical level, the Innovation Project Leader must lead the team through _____.

- A. the corporate audit
- B. the numerous phase-gate milestone reviews the project will encounter
- C. the regulatory filings only
- D. the annual budget cycle only

Q226. On a strategic level, the Innovation Project Leader must be capable of _____.

- A. filing tax returns
- B. playing 'evangelist' for the project across the business
- C. operating the manufacturing line
- D. designing the brand logo

Q227. An effective Project Leader's team composition will typically _____.

- A. remain fixed from FEI to BEI
- B. evolve over the course of the project as needs change
- C. be entirely outsourced to a vendor
- D. be drawn solely from finance

Q228. Why is a Project Leader's network within the business important?

- A.** For social events only
- B.** Because upward influence and cross-functional alignment depend on a built-up network
- C.** Because regulators require it
- D.** Because it boosts headcount

Lesson 15 - Innovation Management Process

Workbook reference: pp. 311-336 | 21 questions

Q229. A business' Innovation Funnel and Pipeline can involve opportunities for which of the following?

- A. New offerings.
- B. New business models.
- C. New markets.
- D. All of the above.

Q230. Generally speaking, Innovation Management is about two activities, namely driving _____ for participatory innovation, and then collecting, evaluating, and selecting the _____ resulting from this.

- A. fun activities / fun ideas
- B. engagement / ideas and opportunities
- C. the business' innovation program / improvement ideas
- D. mandatory participation / new suggestions

Q231. In Stage 1 of the GInI Innovation Management System, a business' Innovation Strategy will guide its investment priorities for its Innovation Portfolio, thereby establishing what about the portfolio?

- A. Its goals.
- B. Its boundaries.
- C. Its scope, depth and impact.
- D. Its size, shape, and speed.

Q232. A popular clustering method used for aggregating new ideas from our Innovation Management "dragnet" is _____.

- A. Affinity Analysis
- B. Like-Minded Review
- C. Gravity Analysis
- D. Cluster Analysis

Q233. What is a key benefit of using structured idea management platforms, such as those employed by large corporations?

- A. They guarantee that every submitted idea will be funded and commercialized.
- B. They enable broad employee engagement, idea submission, voting, and progression of top ideas into prototypes and potential funding.
- C. They remove the need for evaluation and selection stages in the innovation process.
- D. They ensure only senior executives are responsible for generating new ideas.

Q234. What is the main purpose of running a pilot in the innovation process?

- A. To avoid competitor activity and ensure first-mover advantage.

- B.** To provide commercial validation of a concept before full-scale investment.
- C.** To replace the need for market research and evaluation stages.
- D.** To finalize and launch the brand's global marketing campaigns.

Q235. Which of the following is a potential drawback of conducting pilots?

- A.** They provide too much feedback that confuses the development team.
- B.** They can lead to premature commercialization of weak ideas.
- C.** They may cause a business to lose first-mover advantage if competitors move directly to market.
- D.** They always require the development of a Minimum Viable Product (MVP).

Q236. The GInI Innovation Management System (InMS) consists of ____ stages.

- A.** four
- B.** five
- C.** six
- D.** seven

Q237. The six stages of the GInI InMS, in order, are ____.

- A.** Strategy, Capture, Evaluation, Initiation, Pilot, Scale
- B.** Strategy, Funnel, Evaluation, Pipeline, Pilot, Production
- C.** Strategy, Capture, Pilot, Initiation, Evaluation, Scale
- D.** Capture, Strategy, Evaluation, Pipeline, Pilot, Scale

Q238. Among the six stages of the GInI InMS, Stage 4 (Initiation) is ____.

- A.** the shortest stage
- B.** typically the longest stage - projects spend most of their lives here in development and refinement
- C.** the same length as Stage 1
- D.** optional

Q239. Of the six InMS stages, Stages 5 and 6 (Pilot and Scale) are best described as ____.

- A.** foundational
- B.** procedural
- C.** commercial
- D.** optional

Q240. An Innovation Strategy must be ____ in order to focus the organization on common core objectives.

- A.** broad and abstract
- B.** clear/specific AND aligned to the business' broader corporate strategy
- C.** constantly changing
- D.** secret from most employees

Q241. Within any given Innovation Strategy, the various sources of innovation in use - Internal R&D, X-Works Teams, partnerships, new venture investments, business acquisitions - are referred to as ____.

- A.** Funding Vehicles
- B.** Growth Vehicles
- C.** Sales Vehicles
- D.** Cost Vehicles

Q242. Innovation Management (InM) is distinct from Innovation Governance because ____.

- A.** they are entirely unrelated
- B.** Innovation Governance is broader - it covers higher-level governance of the total enterprise innovation program; InM is a subset
- C.** Innovation Management is broader
- D.** Innovation Governance is informal

Q243. A 'Continuous Pipeline of Advantage' refers to ____.

- A.** a constant stream of new business ideas the InM system produces, keeping the business perpetually relevant to its markets
- B.** a hiring funnel for innovation roles
- C.** a recurring billing cycle
- D.** a sustained press coverage strategy

Q244. The 'Concept to Customer' or 'Mind to Market' flow refers to ____.

- A.** the supply chain for raw materials
- B.** the flow within the InM program - from new idea to delivered innovation
- C.** the customer feedback loop alone
- D.** the financial close cycle

Q245. The Dragnet stage of the InMS is primarily concerned with ____.

- A.** scaling commercialization
- B.** capturing opportunities, needs, and other new ideas
- C.** executing pilots
- D.** filing patents

Q246. The Funnel stage of the InMS is primarily concerned with ____.

- A.** capturing new ideas
- B.** evaluating ideas and selecting which to pass forward
- C.** scaling commercialization
- D.** training employees

Q247. The Pipeline stage of the InMS is primarily concerned with ____.

- A.** capturing new ideas
- B.** initiating innovation projects whose business plans get approved and find a champion
- C.** scaling production

D. auditing finances

Q248. The Innovation Proving Ground refers to ____.

- A.** the Capture stage
- B.** the Pilot stage - running pilot projects on new innovations
- C.** the Scale stage
- D.** the Strategy stage

Q249. The Innovation Payback refers to ____.

- A.** the legal phase
- B.** the Scale stage - scaling up new innovations into full market offerings to reap the payback
- C.** the Evaluation stage
- D.** the Capture stage

Lesson 16 - Storytelling

Workbook reference: pp. 337-346 | 9 questions

Q250. Innovation Teams – if they are to be effective – must learn to use what as their primary medium for casting a compelling vision and getting others to buy in to that vision?

- A. Business plans.
- B. Pitch decks.
- C. Storytelling.
- D. Quantitative data.

Q251. According to research on storytelling and cognition, why are stories more effective than abstract ideas or data-heavy presentations?

- A. They reduce the need for market research and customer validation.
- B. They engage imagination and emotion, making complex information easier to understand and remember.
- C. They prevent disagreements within innovation teams by creating consensus automatically.
- D. They are less time-consuming to prepare than analytics-based presentations.

Q252. A good story has three key components, namely _____.

- A. action, conflict, transformation
- B. introduction, body, conclusion
- C. facts, figures, references
- D. title, summary, appendix

Q253. A good story flow runs _____.

- A. beginning (dramatically introduce the gap), middle (supporting info varied in energy), conclusion (picture the better world)
- B. summary, evidence, conclusion
- C. claim, support, refutation
- D. introduction, definition, application

Q254. Storytelling is so important to Innovation Teams that _____.

- A. it is optional
- B. it is a skill Team Leaders are instructed to recruit for when building their teams
- C. it is illegal in some industries
- D. only the CEO is allowed to do it

Q255. An Innovation Team can draw directly from a(n) _____ when constructing the story of their challenge.

- A. P&L
- B. Empathy Map
- C. Org Chart

D. Patent application

Q256. A good story revolves primarily around ____.

- A. a central core character or small group of characters**
- B. an exhaustive history of the company**
- C. footnotes and citations**
- D. anonymous statistics**

Q257. Why is character-driven storytelling effective in conveying an innovation opportunity?

- A. Because it lets the team avoid data**
- B. Because it conveys real human needs and emotions, eliciting empathy**
- C. Because regulators require it**
- D. Because investors find data uninteresting**

Q258. Neurologists tell us that our brains are programmed much more for stories than for ____.

- A. images**
- B. abstract ideas**
- C. music**
- D. numbers**

Lesson 17 - Selecting Winning Ideas

Workbook reference: pp. 347-357 | 13 questions

Q259. It is not uncommon for the Level 1 E&S Process to occur monthly, bi-weekly, or even weekly - depending on what?

- A.** How lean the business operates.
- B.** How fast the business' industry moves.
- C.** How fast a campaign is running and how many ideas it is generating.
- D.** How eager and/or anxious the business' executives are to launch certain new innovations.

Q260. In the Evaluation & Selection process, what role does the Selection Panel (sometimes called the "Angel Committee") play?

- A.** It develops the straw-man business plans for each idea.
- B.** It manages the organization's entire idea database.
- C.** It decides which ideas are promoted into the development and commercialization pipeline.
- D.** It provides funding for all ideas without review.

Q261. The Assimilation Process - managed by Assimilation Teams - involves three steps, namely ____.

- A.** challenging, accumulating, aggregating
- B.** scouting, sorting, scoring
- C.** ranking, racing, rejecting
- D.** writing, reviewing, releasing

Q262. The First-Level Evaluation & Selection process is typically conducted by ____.

- A.** customers
- B.** Innovation Managers
- C.** outside auditors
- D.** the CEO personally

Q263. The Second-Level Evaluation & Selection process is typically conducted by ____.

- A.** customers
- B.** junior staff
- C.** executives from across the business
- D.** external regulators

Q264. Together, the Level 1 and Level 2 E&S Teams serve as the business' ____.

- A.** Pipeline Gatekeepers
- B.** Idea Auditors
- C.** Innovation Police
- D.** Charter Writers

Q265. Level 1 E&S Teams are sometimes simply called _____ and Level 2 E&S Teams are sometimes called _____.

- A.** the Evaluation Group / the Selection Panel
- B.** the Capture Crew / the Strategy Council
- C.** the Innovators / the Investors
- D.** the Funnel Team / the Pipeline Team

Q266. The act of promoting a new idea into the organization's formal Innovation Pipeline is known as _____.

- A.** Conversion
- B.** Ratification
- C.** Authorization
- D.** Affirmation

Q267. Because final selection often involves pitching new ideas to the Selection Panel, the process is sometimes referred to as the _____ and the Selection Panel as the _____.

- A.** 'Angel Pitch' / 'Angel Committee'
- B.** 'Devil's Vote' / 'Devil's Council'
- C.** 'Open Mic' / 'Audition Crew'
- D.** 'Board Defense' / 'Funding Senate'

Q268. Ideas that get selected by the Level 2 Team for additional development typically need _____ - a high-level leader (often a Director) who ensures the project gets attention and resources.

- A.** a Project Initiation Champion
- B.** a Patent Attorney
- C.** a Quality Auditor
- D.** a Procurement Officer

Q269. Rejected ideas in the E&S process are typically _____.

- A.** deleted permanently
- B.** put into a parking lot which gets revisited once a year or so
- C.** sent to legal for review
- D.** made public on the company web site

Q270. Innovation Challenges produce higher-quality inputs than random open-ended submissions because _____.

- A.** they are required by law
- B.** they drive highly focused ideation around a specific challenge
- C.** only senior staff can submit
- D.** they pay cash prizes

Q271. Aggregating new ideas typically means _____.

- A.** filing patent applications

- B.** clustering like ideas together to minimize duplication and redundancy (often via Affinity Analysis)
- C.** deleting them from the database
- D.** selecting them for funding

Lesson 18 - Integration

Workbook reference: pp. 358-362 | 2 questions

Q272. What is the first step in integrating everything learned in innovation management into practice?

- A.** Brainstorming solutions with the crowd.
- B.** Submitting opportunities to the Evaluation & Selection process.
- C.** Understanding the business' Innovation Strategy to steer all innovation activities.
- D.** Managing the Innovation Pipeline to maximize investment.

Q273. In Step 2 of the integration process, "Needfinding" primarily involves:

- A.** Testing prototypes through pilots.
- B.** Hunting for unmet and unarticulated needs, unresolved pain points, and future trends.
- C.** Executing projects to deliver final innovations.
- D.** Refining the business case for strategic approval.

Lesson 20 - Engagement

Workbook reference: pp. 367-387 | 8 questions

Q274. For most workers, engagement involves participating in various internal grassroots activities and events – mainly outside the scope of their normal day-to-day jobs – aimed at driving the identification of what for the business?

- A.** Innovative new technologies the business can pursue.
- B.** New needs and innovation opportunities the business can pursue.
- C.** New cost-reduction initiatives the business can pursue.
- D.** New operational excellence initiatives the business can pursue.

Q275. At any given time, a healthy innovation program will employ a variety of the Mechanisms of Engagement. Why?

- A.** So as to satisfy each stakeholder in the business in order to ensure strict conformance to the strategic plan.
- B.** So as to deliver multiple opportunities to tout the business' innovativeness inside various Public Relations campaigns.
- C.** So as to ensure everyone in the organization is happy that their ideas are being used.
- D.** So as to feed multiple different areas of the program and drive a wide range of outcomes.

Q276. Which of the following are used as reinforcement mechanisms in the organization's innovation program?

- A.** Promotions, Raises, and Larger Offices.
- B.** Being featured in corporate ads and being sent to represent the business at innovation trade shows.
- C.** Incentives, Rewards, and Recognition
- D.** Money, Fame, and Power.

Q277. One of the Program Leader's jobs is to monitor the overall level of engagement across the organization to ensure the business is achieving the level of _____ it needs for its innovation program to succeed over the long run.

- A.** executive sponsorship
- B.** bottom-up engagement
- C.** fun and excitement
- D.** media coverage

Q278. Mechanisms of Engagement typically include _____.

- A.** only mandatory company-wide meetings
- B.** a variety of grassroots events, campaigns, challenges, and idea drives mostly outside day-to-day jobs
- C.** performance review forms only
- D.** external press releases only

Q279. The Program Leader's first task in driving engagement is to be _____.

- A.** a resourceful leader and enthusiastic cheerleader
- B.** a strict enforcer of compliance
- C.** the chief auditor
- D.** the budget controller

Q280. Why are Recognition mechanisms (e.g., public acknowledgment) important to engagement?

- A.** They are required by HR policy
- B.** They reinforce participatory behavior and make innovation work visible and valued
- C.** They reduce the need for any monetary incentive
- D.** They eliminate the need for selection committees

Q281. Sustained engagement in the program serves which broader business purpose?

- A.** Reducing operational costs only
- B.** Feeding the InM system with a constant flow of needs, ideas, and opportunities
- C.** Replacing the marketing function
- D.** Increasing dividends only

Lesson 21 - Open Innovation

Workbook reference: pp. 388-400 | 11 questions

Q282. Open Innovation suggests that a business should open itself up to _____ - a practice that lets the business deliver new innovations it never could have otherwise, which in turn can accelerate the new innovations the business is able to bring to market, allowing it to become a market leader and/or leapfrog its competitors.

- A. the broader universe of technologies and capabilities that an entirely new set of outside partners can bring
- B. an extremely ambitious product roadmap
- C. a grueling technology development schedule
- D. a highly aggressive Innovation Strategy

Q283. Crowdsourcing has been referred to as availing the business to what?

- A. "The ignorance of the people."
- B. "The whims of society."
- C. "The knowledge of the masses."
- D. "The wisdom of the crowd."

Q284. What is "NineSigma" a platform for?

- A. Crowdfunding
- B. Subject Matter Expert engagements
- C. Online IP brokerage
- D. Curated Open Innovation Partnerships

Q285. The Innovation Manager who is responsible for cultivating external partnerships, alliances, and Open Innovation activities serves as _____.

- A. the Project Leader
- B. the Liaison
- C. the Auditor
- D. the Closer

Q286. Inbound Open Innovation refers to _____.

- A. the business bringing external innovations into its own pipeline (e.g., via tech scouting, partnerships, acquisitions)
- B. the business pushing its own innovations outward to license
- C. the business hiring new employees
- D. the business going public

Q287. Outbound Open Innovation refers to _____.

- A. pulling external innovations into the pipeline
- B. the business pushing its own innovations outward (e.g., out-licensing, spin-offs)
- C. outsourcing R&D entirely

D. an exit strategy

Q288. A primary benefit of Open Innovation is that it can ____.

- A.** eliminate all internal R&D needs
- B.** accelerate the new innovations the business can bring to market
- C.** guarantee market success
- D.** remove all financial risk

Q289. Crowdsourcing as a mechanism is most useful when ____.

- A.** the business wants to keep all ideas confidential
- B.** the business wants to draw on a broad external community for ideas, problem-solving, or contributions
- C.** the business has all the talent it needs internally
- D.** regulators require it

Q290. Prize challenges as an Open Innovation mechanism are intended to ____.

- A.** restrict participation to one inventor
- B.** motivate a broad group of external solvers to compete to solve a specific challenge
- C.** guarantee a particular result
- D.** fund regulatory compliance

Q291. Open Innovation can allow a business to ____.

- A.** become a market leader and/or leapfrog its competitors by accessing capabilities it doesn't have internally
- B.** avoid all market research
- C.** eliminate the need for an Innovation Strategy
- D.** stop investing in talent development

Q292. A possible risk of Open Innovation is ____.

- A.** intellectual property and confidentiality management complexity
- B.** the elimination of all internal innovation
- C.** automatic regulatory penalties
- D.** loss of all customer relationships

Lesson 22 - PM Tools

Workbook reference: pp. 401-410 | 8 questions

Q293. There are a number of Program Management and Project Management tools and methods in use for good Innovation Management. The most common of these are what?

- A.** Project Management SW / CAD SW / Product Data Management SW / Technology Roadmapping / Agile Project Management.
- B.** Innovation Governance SW / Portfolio Mapping SW / Program Management SW / Innovation Roadmapping / Scrum Project Management.
- C.** Idea Management SW / Portfolio Management SW / Product Lifecycle Management SW / Product Roadmapping / Phase-Gate Project Management.
- D.** Enterprise Resource Planning SW / Innovation Mapping SW / Financial Modeling SW / Lean Thinking / Agile Thinking

Q294. Product Roadmapping is a routine Product Management practice used to ____, and is thus mainly used for managing the incremental innovations driven by a Product Manager.

- A.** guide the successive generations of a particular technology
- B.** plan out successive generations of a particular product line
- C.** plan out successive generations of sales, marketing, and branding strategies
- D.** orient the business more toward products and less toward services.

Q295. In Phase-Gate Project Management, management reviews are conducted at the individual toll gates in order to assess the progress of the project against pre-established criteria. If the project is unable to satisfy these criteria, what happens to it?

- A.** It proceeds on to the next phase in the project.
- B.** It is either redefined into a different project, combined with another project, or terminated.
- C.** It moves on anyway, since the milestone reviews are usually just "check-in-the-box" exercises.
- D.** It is terminated, along with the team working on it.

Q296. Idea Management software is primarily used to ____.

- A.** draft press releases
- B.** capture, catalog, and manage new innovation ideas across the business
- C.** manage payroll for the innovation team
- D.** schedule executive calendars

Q297. Portfolio Management software for innovation is primarily used to ____.

- A.** pay vendor invoices
- B.** track and manage the mix of innovation projects across the portfolio against the Innovation Strategy
- C.** process expense reports
- D.** design product packaging

Q298. Product Lifecycle Management (PLM) software is primarily used to ____.

- A.** manage hiring
- B.** manage product data and engineering changes across the product lifecycle
- C.** set marketing budgets
- D.** approve press releases

Q299. Phase-Gate Project Management is characterized by ____.

- A.** unstructured progress reviews at any time
- B.** structured gate reviews at defined milestones with go / pivot / no-go criteria
- C.** no review checkpoints at all
- D.** self-assessment by each engineer only

Q300. Which of the following is the BEST way to describe how these tools fit together?

- A.** Each tool replaces the others
- B.** Each tool addresses a different stage of the InM system - together they support end-to-end innovation management
- C.** All tools must be used simultaneously to avoid penalty
- D.** Tools are optional and irrelevant
